

TABLE OF CONTENTS

TOPIC	CONTENTS SAMPLE	ILLUSTRATIONS
Disclaimer		Chapter
Note to Reader		3-2 Fig. 1-foundation sill penetrations Fig. 2-under floor clearances Fig. 3-weep screed clearances
Introduction		3-3 Fig. 4A-general framing nailing requirements
Acknowledgments		3-4 Fig. 4B-general framing nailing requirements
Chapter		3-5 Fig. 5- over driven nail
1 Site work		4-1 Shear & Framing elevations for details
2 Foundations		4-2 Fig. A-roof connection to exterior wall at eave Fig. B-attic shear-wall extension in conventional roof framing
3 Framing		4-3 Fig. C-attic shear-wall between trusses Sect. A-A-attic shear-wall between trusses
4 Shear and framing details		4-4 Fig. D-interior shear-wall connection to roof Fig. E-shear-wall connection at flat roof
5 Shear-wall check list		4-5 Fig. F-shear transfer at I-joist floor on rim joist
6 Exterior, interior finish		4-6 Fig. G-exterior wall through-floor shear transfer with sheathing spliced on block or rim joist Fig. H-through-floor shear-wall connection with solid sawn framing
7 Electrical		4-7 Fig. K-through-floor shear-wall connection with solid sawn framing Sect. B-B-Elevation of through-floor shear transfer; solid-sawn framing
8 Electrical checklist		4-8 Fig. M-interior wall with high stem condition Fig. N-interior wall with cripple wall
9 Mechanical		4-9 Fig. P- shear-wall connection at exterior wall
10 Mechanical checklist - rough / final		4-10 Fig. 7-typical construction diaphragm
11 Plumbing checklist - rough / final		6-2 Fig. W-flashing detail - Concrete to wood
11~4 Water heater		11-4 Fig. Z-water heater
12 Appendix		12~1 Slab - on grade - raised floor construction 12~2 Allowable spans - nailing schedule 12~3 Roofing details 12~4 Wall details 12~5 Window details 12~6 Residential requirements
